Customer Support Overview

Contact your distributor, sales representative, or Aetina's customer service center for technical support if you need additional assistance. Please have the following information ready before you call:

- Product name and serial number
- Description of your peripheral attachments
- Description of your software (operating system, version, application software, etc.)
- A complete description of the problem
- The exact wording of any error messages

Visit the Aetina website at https://www.Aetina.com/support-warranty-policy.php where you can find the latest information about the product.

Product Warranty (2 years)

Aetina warrants to you, the original purchaser, that each of its products will be free from defects in materials and workmanship for two years from the date of purchase.

This warranty does not apply to any products which have been repaired or altered by persons other than repair personnel authorized by Aetina, or which have been subject to misuse, abuse, accident or improper installation. Aetina assumes no liability under the terms of this warranty as a consequence of such events.

Because of Aetina's high quality-control standards and rigorous testing, most of our customers never need to use our repair service. If an Aetina product is defective, it will be repaired or replaced at no charge during the warranty period. For out of warranty repairs, you will be billed according to the cost of replacement materials, service time and freight. Please consult your dealer for more details.

If you think you have a defective product, follow these steps:

- 1. Collect all the information about the problem encountered. (For example, CPU speed, Aetina products used other hardware and software used, etc.) Note anything abnormal and list any onscreen messages you get when the problem occurs.
- 2. Call your dealer and describe the problem. Please have your manual, product, and any helpful information readily available.
- 3. If your product is diagnosed as defective, obtain an RMA (return merchandise authorization) number from your dealer. This allows us to process your return more quickly.
- 4. Carefully pack the defective product, a fully-completed Repair and Replacement Order Card and a photocopy of the proof of purchase date (such as your sales receipt) in a shippable container. A product returned without proof of the purchase date is not eligible for warranty service.
- 5. Write the RMA number visibly on the outside of the package and ship it prepaid to your dealer.

ESD Warning

This product, like all electronic products, uses the product that can be damaged by electrostatic discharge (ESD). When handling, care must be taken so that the devices are not damaged. Damage due to inappropriate handling is not covered by the warranty. The following precautions must be taken:

- Do not open the protective conductive packaging until you have read the following and are at an approved anti-static workstation.
- If working on a prototyping board, use a soldering iron or station that is marked as ESD-safe.
- Always disconnect the product from the prototyping board when it is being worked on.
- Always discharge yourself by touching a grounded bare metal surface or approved anti-static mat before picking up an ESD - sensitive electronic component.
- Use an approved anti-static mat to cover your work surface.

Safety Precautions

Please read the following safety instructions carefully. It is advised that you keep this manual for future references:

- 1. All cautions and warnings on the equipment should be noted.
- 2. Make sure the power source matches the power rating of the device.
- 3. Position the power cord so that people cannot step on it. Do not place anything over the power
- 4. For plug-in equipment, the power outlet socket must be located near the equipment and must be easily accessible.
- 5. Disconnect this equipment from any AC outlet before cleaning. Use a damp cloth. Do not use liquid or spray detergents for cleaning.
- 6. Always completely disconnect the power before working on the system's hardware.
- 7. Keep this equipment away from humidity.
- 8. Put this equipment on a reliable surface during installation. Dropping it or letting it fall may cause damage.
- 9. The openings on the enclosure are for air convection. Protect the equipment from overheating. DO NOT COVER THE OPENINGS.
- 10. Be sure that the room in which you choose to operate your system has adequate air circulation. Ensure that the chassis cover is secure.
- 11. The chassis design allows cooling air to circulate effectively. An open chassis permits air leaks, which may interrupt and redirect the flow of cooling air from internal components.
- 12. Never pour any liquid into an opening. This may cause fire or electrical shock.
- 13. If the equipment is not used for a long time, disconnect it from the power source to avoid damage by transient overvoltage.
- 14. Never open the equipment. For safety reasons, the equipment should be opened only by qualified service personnel.
- 15. If any of the following situations arises, please the contact our service personnel:
 - Damaged power cord or plug
 - Liquid intrusion to the device
 - Exposure to moisture
 - Device is not working as expected or in a manner as described in this manual
 - The device is dropped or damaged
 - vi. Any obvious signs of damage displayed on the device

Introduction

DeviceEdge AGX Orin series - AIE-PX11/ AIE-PX12/ AIE-PX21/ AIE-PX22 is a standard system, supporting for NVIDIA Jetson AGX Orin.

1.1 Features

- Supports NVIDIA Jetson AGX Orin™ 32GB/64GB module
- 2/4 x IEEE 802.3af GbE PSE ports
- 1 x GbE/1 x 10GbE LAN port
- 1 x B-Key/1 x E-Key/1 x M-Key slot
- Wide Input Voltage Range 9 to 36 VDC
- Operating Temperature -25°C ~ +55°C
- Supports OOB (out-of-band) powered by Innodisk (optional)
- Fanless Design

1.2 Specifications

System configuration

Specification	AIE-PX11	AIE-PX12	AIE-PX21	AIE-PX22
Module Compatibility	NVIDIA Jetson AGX Orin 32GB		NVIDIA Jetson AGX Orin 64GB	
Al Performance	200 TOPs		275 TOPs

2.3 Power Consumption

The power consumption shown as below is the theoretical value with AGX Orin module installed on AIE-PX11

Туре	Theoretical Maximum System power	
Idle	7.5 W (Connect with Keyboard, Mouse and HDMI Display)	
Full Loading	79 W (Connect with Keyboard, Mouse, HDMI Display, LAN and 2 PSE ports with	
	CPU And GPU 100% Loading)	

AIE-PX12

Туре	Theoretical Maximum System power	
Idle	7.5 W (Connect with Keyboard, Mouse and HDMI Display)	
Full Loading	109 W (Connect with Keyboard, Mouse, HDMI Display, LAN and 4 PSE ports with	
	CPU And GPU 100% Loading)	

AIE-PX21

Туре	Theoretical Maximum System power	
Idle	8 W (Connect with Keyboard, Mouse and HDMI Display)	
Full Loading	100 W (Connect with Keyboard, Mouse, HDMI Display, LAN and 2 PSE ports with	
	CPU And GPU 100% Loading)	

AIE-PX22

Туре	Theoretical Maximum System power	
Idle	8 W (Connect with Keyboard, Mouse and HDMI Display)	
Full Loading	130 W (Connect with Keyboard, Mouse, HDMI Display, LAN and 4 PSE ports with	
	CPU And GPU 100% Loading)	

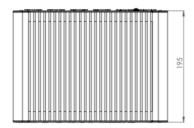

Please refer to the following power consumption of individual I/O interface according to your use case.

Туре	Theoretical Maximum System power
USB 3.2 Gen1 Type A (per Port)	4.5 W
USB Type C	4.5 W
HDMI	0.25 W
M.2 E KEY	2 W
M.2 M KEY	7 W
M.2 B KEY	3 W
CAN Bus	1 W
SD Card	0.72 W
RJ45(1G)	0.83 W
RJ45(10G)	3.43 W
PoE (per Port)	15 W (IEEE 802.3af compliant)

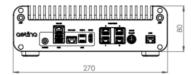

2.4 Mechanical Dimensions

■ System & Mounting Dimensions

Integration assembly drawing for AIE-PX11/ AIE-PX12/ AIE-PX21/ AIE-PX22 system.

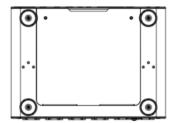

3. Software Installation

Aetina NVIDIA Jetson products have built-in BSP so the users don't have to install it after getting the products. Since we develop our own BSP, the users may need to follow the BSP installation SOP to re-install/upgrade/downgrade the BSP. Please visit the Aetina website or contact with Aetina FAE at Tech support@aetina.com for installation guides, BSPs and technical tips.

4. Recovery Mode

The USB2.0 Type-C (support OTG) port of AIE-PX11/ AIE-PX12/ AIE-PX21/ AIE-PX22 can be connected to another host device (Linux PC running NVIDIA Jetpack™) to run recovery process for re-flashing BSP.

Note: Please backup user personal files before flashing process

Step 1: Connect the OTG USB port to another host device which supplying updated BSP file.

Step 2: Press and hold the Reset button, then press and hold the Recovery button continually.

Step 3: After one second (1 sec.) release the Reset button first, then release the Recovery button.

Step 4: The AGX Orin will show up as a new NVIDIA device on USB list (Terminal console) at the host device.

Step 5: Running re-flashing BSP process can be executed by the host device now.

5. Initial Setup

Before using AIE-PX11/ AIE-PX12/ AIE-PX21/ AIE-PX22, please follow the steps below to have initial setup.

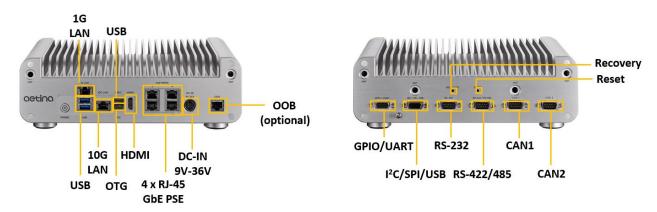

5.1 Prepare the Materials

Please prepare the materials list below.

- A monitor with HDMI and respective cables
- USB keyboard and mouse
- Ethernet cable

5.2 Hardware Connection

Here is the AIE-PX11/ AIE-PX12/ AIE-PX21/ AIE-PX22 below and for the initial setup, users will need to connect LAN port, keyboard and mouse via USB interface, HDMI interface, and power connector.

5.3 Setup Details

- Connect to the monitor while powering off
- 2. Power on and automatically enter the OS
- Log in to the Ubuntu OS via credentials below

Username: nvidia Password: nvidia

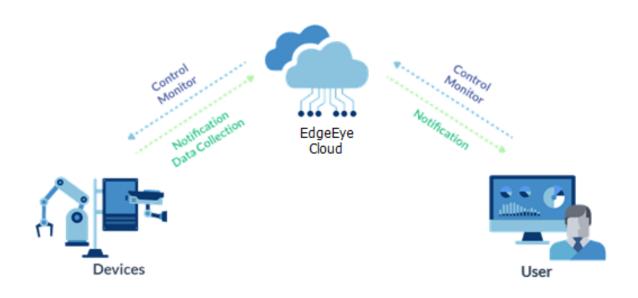

For more information on how to use Ubuntu and NVIDIA Jetson modules, please visit Ubuntu and NVIDIA website.

6. EdgeEye

Aetina Edge Administration Platform

Introduction

To help clients efficiently and systematically manage edge devices deployed in different locations, Aetina offers several cloud management platforms. For example, EdgeEye, an Aetina browseraccessed management platform, allows clients to conveniently manage edge devices via intranetconnected cell phones, tablets, or laptops, no matter where the devices are deployed. It shows diversified status of devices with user-friendly interfaces to help clients check if user-defined values are in the normal range, including CPU/GPU loading and temperature, memory loading, storage status, deployment sites, and unsolved events setting. In addition, EdgeEye supports functions of reboot, shutdown, backup, and recovery via out-of-band management modules, especially when clients are intuitively aware of abnormal charts on the dashboard.

6.2 Feature

Edge Device Management

Monitor edge devices' hardware status, such as CPU, GPU, Memory's utilization and capacity.

Alert Notification

Customized alert threshold and when getting abnormal data from edge devices, send warning notification immediately.

Remote Controlling

Reboot and shut down edge device through the operating system's command from server when needs.

User-Friendly Operation Interface

User can set and arrange monitoring data format by their needs.

Group devices control and Scheduler

6.3 System Requirements

Web Service

Web browsers support HTML5, CSS3, JavaScript

Microsoft Edge: 103.0+ Google Chrome: 9.0+

Firefox:15.0+ Safari:5.1+

Server

Hardware Minimum Requirements:

Intel® Core™ i5 2.3 Ghz CPU or above

32 GB RAM

200 GB root partition for the system

Operating System:

Linux Ubuntu 20.04+

Browser:

Google Chrome 9.0+

Client

Support all Aetina products
